# Horoscope

What do the next few months hold in store for you?  
*Spa World* astrologer Diana McMahon-Collis charts the planetary patterns reflecting the influences in your life.

## February-March 2007

A spate of mix-ups between Valentine's Day and March 8th may seem frustrating, but judgment should be reserved, as end results look favorable! March brings powerful eclipses of the Sun and Moon and the wheat is sorted from the chaff wherever it has been difficult to make moves and decisions. New relationship developments are indicated with Venus, the universal astrological symbol for love, making a quick string of connections.

Diana teaches astrology and runs a confidential tarot and astrology readings practice, exploring potential and examining issues in a sensitive and inspirational way. For further information email: [spaworld-astrologer@directdestiny.com](mailto:spaworld-astrologer@directdestiny.com).

### ARIES

March 21-April 19

An unexpected opportunity to forge ahead with career and other ambitions should be quickly grasped in February. What you know is helpful but who you know will be vital as the month progresses. It may become clear in March that you need to make a sacrifice in order to have the organisation or lifestyle that you really want. Your attraction factor is high and you can cement important connections.

### LEO

July 23-August 22

Any spate of confusion over finances and resources will eventually clear and you should be able to sidestep bureaucracy and focus on progressing your grander plans. Your sense of identity and self-esteem may have taken some knocks en route, so find ways to make it up to yourself in March. Romance, spiritual expansion and foreign themes could be closely linked as you search for answers to business and personal questions.

### SAGITTARIUS

November 22-December 21

You won't want to get bogged down in a family or domestic situation, but your input could be needed regarding basic issues in at least one key area. Putting a project on a firm footing may not seem truly possible until after the Sun's eclipse on March 19th. By then, however, will you still want the same things that you wanted yesterday? Only time, and your heart, will tell!

### TAURUS

April 20-May 20

For Taurus to break the mould is always a challenge, but inspiration from friends is a gift worth responding to, so be ready to alter your usual patterns. New windows of opportunity open around March's eclipses on the 3rd and 19th, so make the most of any creative urges and chances to link or split with groups and associations, as appropriate. Inner healing is important, whilst outer expansion can wait.

### VIRGO

August 23-September 22

The Virgo critical nature needs extra vigilance until March 8th whilst Mercury, your ruling planet, is in retrograde, so don't be too quick to judge anyone, including yourself. March's eclipse energy may make you wonder if you're being squeezed out somewhere, when the signals are ultimately about your own relationship decisions. Take heart and ask for the support that you need; those who respond kindly can be counted as true friends.

### CAPRICORN

December 22-January 19

Plans or decisions made before February 14th may seem to unravel before your eyes after that date, yet the situation will not be as threatening as it appears. Life will likely become easier once you accept that choices have to be limited. There is a good reason why you may not simply 'have it all' for a while – most probably, it comes with too much responsibility and would prove burdensome!

### GEMINI

May 21-June 20

If your career path seems slow or lacking direction it suggests you need time to rethink your approach and desired results. A change in your domestic or family structure could make quite a difference to what is possible in the future, so keep an open mind. You need either extra space or more intimacy in a relationship situation; don't worry as contact with friends is bound to improve your perspective.

### LIBRA

September 23-October 22

The "devil in the detail" seems key for you over the next few months. It is important that you do not allow outside situations to affect you too personally. Remember that everyone has unresolved issues and their problems are not automatically your problem. Support will be freely given from friends, neighbours and loved ones where any preference for help is identified so don't forget to ask for what you need.

### AQUARIUS

January 20- February 18

The best use of resources may not be instantly clear, so avoid rushing decisions concerning money and manpower. Sometimes further developments must occur before you can identify a clear path ahead and this now seems very appropriate. A long-standing association may be changing or could need to change soon. Others will be more open to your ideas than you think in March; so don't be afraid to voice them.

### CANCER

June 21-July 22

The question of where to locate yourself for the best results is increasingly significant. No need to panic if foreign plans or more distant contacts cannot be developed with ease; as March unfolds all is likely to become clear as to why. Don't wait until the fullness of spring for any kind of reorganisation, though; any effort that helps to move some stagnant energy seems to be a good thing.

### SCORPIO

October 23 -November 21

Your need to operate as a free agent may seem temporarily hampered in February; rather than view this as an aggravation, try considering that your help and leadership may be needed at a group level. Recent directives or decisions concerning finances will need review again over the coming weeks. It is likely there are solutions that will keep everyone happy if you are willing to go over a few details.

### PISCES

February 19-March 20

Your personal direction must take precedence in the early part of this period, but coming changes could soon make you feel differently about how best to use your time. Someone else's needs look set to take priority – and there will very likely be some real, personal satisfaction from contributing to a team or group situation. An eventual rethink of responsibilities may, nonetheless, be advisable, to avoid any long-term overload.
